- Clean & Maintainable Code
- Frontend-Backend Integration
- Problem Solving & Critical Thinking

Work Experience

2025 – November

TRENDORA React.js Frontend, Fake Backend

Trendora Website

Role: Frontend Developer

Technologies: React.js, HTML, CSS, JavaScript, Fake Backend(JSON)

Project Highlights:

- Developed a fully responsive e-commerce frontend using React.js.
- Implemented product listing, shopping cart, and search functionality.
- Used a fake backend (JSON files / mock API) to simulate data and API responses.
- Focused on clean UI, smooth user interactions, and modern design.

2026 – January

EYRA – E-commerce Sunglass Website

Role: Fullstack Developer (Frontend & Backend)

Technologies: React.js, Django, Django REST Framework, JavaScript, HTML, CSS

Project Highlights:

- Developed both frontend and backend of an e-commerce sunglass website.
- Built a React.js frontend with responsive design and interactive UI components.
- Implemented Django REST Framework backend for product management, user authentication, and order handling.
- Integrated frontend with backend APIs for real-time data interaction.
- Focused on user experience, secure data flow, and seamless application performance.

2026 – March

ZIAS – Fullstack Training Management Website

Role: Fullstack Developer (Frontend & Backend)

Technologies: React.js, Django, Django REST Framework, JavaScript, HTML, CSS

Project Highlights:

- Developed a training management platform for students, mentors, and admins.
- Built React.js frontend with dynamic dashboards, forms, and interactive UI components.
- Created Django REST Framework backend for managing students, courses, mentors, and roles.
- Implemented API integration to ensure smooth communication between frontend and backend.
- Focused on role-based access, responsive design, and efficient user workflow.
