PROFILE

Detail-oriented Backend Developer with hands-on experience in Python and Django. Skilled in building scalable RESTful APIs using Django REST Framework (DRF), handling authentication, and managing databases. Experienced in integrating backend services with frontend applications and ensuring secure, efficient data flow. Strong understanding of server-side logic, API development, and database design.

WORK EXPERIENCE

EYRA – E-COMMERCE SUNGLASS WEBSITE (BACKEND)

- Built an e-commerce sunglass website with complete frontend and backend integration.
- Implemented REST API integration for product management, orders, and user authentication.
- Applied React.js state management and responsive design principles.

ZIAS | FULLSTACK DEVELOPER – REACT.JS & DJANGO REST FRAMEWORK

- Developed a training management platform for students, mentors, and admins.
- Implemented React.js frontend components integrated with DRF backend.
- Built features such as student registration, course management, and dashboard analytics.
